ACCESSORIES

DURABLE, SUSTAINABLE AND WELL-DESIGNED. THAT'S WHAT WE'VE STOOD FOR SINCE 1969.

Are you looking for high-quality clothing that lasts longer than the vast majority of other textiles? Is having the highest environmental, social and safety standards important to you? What about thinking corporate wear requirements down to the very last detail?

Welcome to HAKRO! As a family business, we are not beholden to shareholders and consistently act on the basis of our values of durability, sustainability and quality design that we have stood for since our creation in 1969. The next generation have now taken over the business.

WHAT
WE'RE
MADE OF

HAKRO corporate wear saves companies money, boosts environmental performance, supports employees in the course of their work and promotes team spirit.

But because our clothes also look good, fit perfectly and can be worn with a clear conscience – they also feel great to wear.

This way, wearers can show what they are truly made of (see examples on the following pages).

Quality without compromise

AS STRONG AS STEEL.

Durability is always a question of the right material. The more it is stressed, the stronger it has to be. Seen in this light, HAKRO is the “steel” of the corporate wear segment – robust, durable and utterly reliable ... but much more comfortable.

HAKRO HÄLT. This promise is our DNA. This is why we have been working on improving the durability of our garments since 1969.

The wearer will notice that even after many washes, everything fits, functions and lasts like it did on the first day. We are perfectionists who pay attention to even the smallest details like specially developed high-performance fiber blends that are optimised and equipped for the demands of the relevant sector. Our elastic seams are made of high-quality yarns that embrace every movement instead of tearing while our break-resistant buttons stay where they belong thanks to lock stitch. Our zips won't give way amid the rough and tumble of the working day.

You can count on it.

Examples of why HAKRO clothing is so durable:

ROBUST, INNOVATIVE AND FUNCTIONAL MATERIAL

HIGH-QUALITY YARNS AND STURDY, FLEXIBLE SEAMS

BREAK-RESISTANT BUTTONS AND HIGH-QUALITY YKK® ZIPS

FIRST CLASS TEXTILE FINISHES

Lasting colors

WEATHER, WATER AND WASH-RESISTANT.

Sun, salt, wind and water – what sounds like a holiday can quickly become an endurance test at work. This is especially the case with textile dyes that tend to fade under the strain. The solution is our unique HAKRO TRUE COLORS radiant color technology.

Lightfast, sweat resistant, washable – and always consistent.

With HAKRO TRUE COLORS color technology, we guarantee maximum color precision and stability for your corporate wear not only upon delivery but also long after garments have been worn and washed many times.

At the same time, special color assurance processes ensure that the colors of all models in the collection are matched as closely as possible. This is key for those of you who care about your company's corporate look. And what's more, the same color will still be available many years later if repeat orders are placed.

Like we said – simply radiant color technology.

Examples of why HAKRO clothing is so great:

TRUE COLORS

HIGH LUMINOSITY

PARTICULARLY
WASH RESISTANT

COLOR MATCH ACROSS

ALL COLORS
AVAILABLE IMMEDIATELY

Functional high-tech

SUPER-PERFORMANCE.

Every job is about flawless delivery. But those who work outside always have an extra challenge – the weather. HAKRO helps teams perform even under adverse conditions by offering high-tech functional clothing for all types of weather.

Outdoor clothing for professionals: from scorching sun to rain, snow and sleet, the HAKRO range boasts the perfect fabrics for all seasons and all types of weather.

On hot days, COOLMAX® PRO supports the body with a pleasant cooling effect while HAKRO COTTON TEC® compensates for changes in temperature. TRIACTIVE® PRO keeps the wearer dry even with a water column of 5,000 millimeters while its super-light softshell protects against wind, keeping the wearer warm and cosy on cold days. The fabrics in the MIKRALINAR® range are a functional miracle while COOLMAX® PRO offers special anti-odour protection for high-intensity activities.

Naturally, all our high-tech textiles are breathable – they not only protect from the outside, they are comfortable inside.

Examples of how we functionally optimise HAKRO clothing:

TEMPERATURE
COMPENSATING

WATERPROOF AND
BREATHABLE

WARMING
AND LIGHTWEIGHT

SWEAT RESISTANT

NO. 721, HAKRO Chino trousers Stretch, 034 ink

Quality guaranteed

GERMAN PERFECTIONISM IN TEXTILES.

While being conscientious and leaving nothing to chance may sound boring – it proves its worth at HAKRO through our consistently excellent quality. As our customers know.

Quality control is key. We are not a fashion brand, we make premium workwear for businesses. This is a fundamentally different business model because our clothing is about far more than just looking good.

We have a responsibility to your staff to ensure that our clothing offers the best possible protection and support during their working day, no matter the challenges involved. And we stand by our word that your investment in HAKRO will pay dividends thanks to our outstanding durability.

That's why we often invest years of intensive research into developing innovative solutions like the MIKRALINAR® range or the HAKRO TRUE COLORS technology. And that's also why we can guarantee the consistent first-class quality of all materials, components and processes with multi-stage controls along the entire production chain.

With a complaint rate of just 0.1%, we believe we are on the right track.

Examples of how HAKRO quality is controlled:

MATERIAL CONTROL

**VISUAL
SURFACE INSPECTION**

**ELECTRONIC
COLOR CONTROL**

INFEEED CONTROL

FINAL CONTROL

Committed to sustainability

NO CUTTING CORNERS.

As a medium-sized family business, we have to ensure a safe future for the next generation, not just here in Schrozberg, but anywhere we can have a positive influence.

Sustainability may not be a fashionable topic, but it is an existential one. This is why we have repositioned ourselves to consistently integrate sustainability into all our business processes. We believe that this is the only way to mitigate the increasing risks facing the environment, nature, biodiversity and climate as well as those in our business environment.

Our challenges and goals in this regard are documented in our Integrated Sustainable Management Report 2022, available at www.hakro.com.

Beyond this reporting duty, however, our own sense of responsibility pushes us to act sustainably. As a textile industry “player”, we are part of a global system in which there is still a lot of room for improvement – from the raw materials and production stage to sales and logistics.

By joining forces, we can make changes. We have taken action and become certified, setting groundbreaking new textile standards.

Examples of our memberships and standards:

NO. 560, HAKRO Hooded sweatshirt organic cotton GOTS, 010 royal blue

NO. 269, HAKRO COTTON TEC® T-Shirt, 017 burgundy
NO. 724, HAKRO Active trousers, 080 khaki

Climate protection

DRESSING RESPONSIBLY!

Since 2017, the HAKRO site in Schrozberg has been carbon neutral – and in 2022 we became the first corporate wear supplier to make our entire collection carbon neutral. It’s good for us ... and for the climate ... and for you.

Dressing responsibly! At our Schrozberg site, we started investing in clean energy at an early stage. Now our site largely self generates green electricity and boasts an extensive energy management system with battery storage. We operate our own combined heat and power plant. And our fleet will soon be completely combustion-free.

We are also very resourceful when it comes to waste recycling and do not lose sight of the small steps amid bigger milestones. For example, we reuse cardboard packaging wherever possible. And of course, we have printed matter like this brochure produced in a carbon neutral way. And most importantly, we offset the carbon footprint of our entire collection.

1.5 degrees is the goal – together, we can do it.

Examples of our climate action in Schrozberg:

**CARBON NEUTRAL
COMPANY
SINCE 2017**

**CARBON NEUTRAL
PRODUCTS
SINCE 2022**

**THIS BROCHURE
IS A CARBON NEUTRAL
PRODUCT**

Global fairness

WITHOUT A BITTER AFTERTASTE.

Prosperity is great if it is based on a sustainable and socially just supply chain – the idea behind fair production. A lot has happened and we now always have the choice between fair or unfair. We have made the right choice. You can do the same.

We strive for better working conditions everywhere. The purpose of our high-quality corporate wear is to create a better working environment for your teams. Naturally, we also assume this responsibility along the supply chain.

That's why we are completely committed to fair working and living conditions when it comes to the manufacture of our products. We provide our production partners with long-term planning security with guaranteed acceptance. And we treat the people in our supply chain with the same degree of respect as we do our employees and customers.

Fair pay above the statutory minimum wage and voluntary health and social benefits have been standard at HAKRO for decades. And since January 2021, we have been a member of the Fair Wear Foundation with whom we work on an ongoing basis to improve working conditions in textile production in the long term.

We also want to set an example and show that it is possible to embrace fairness without adversely affecting growth.

Examples of how HAKRO implements fairness:

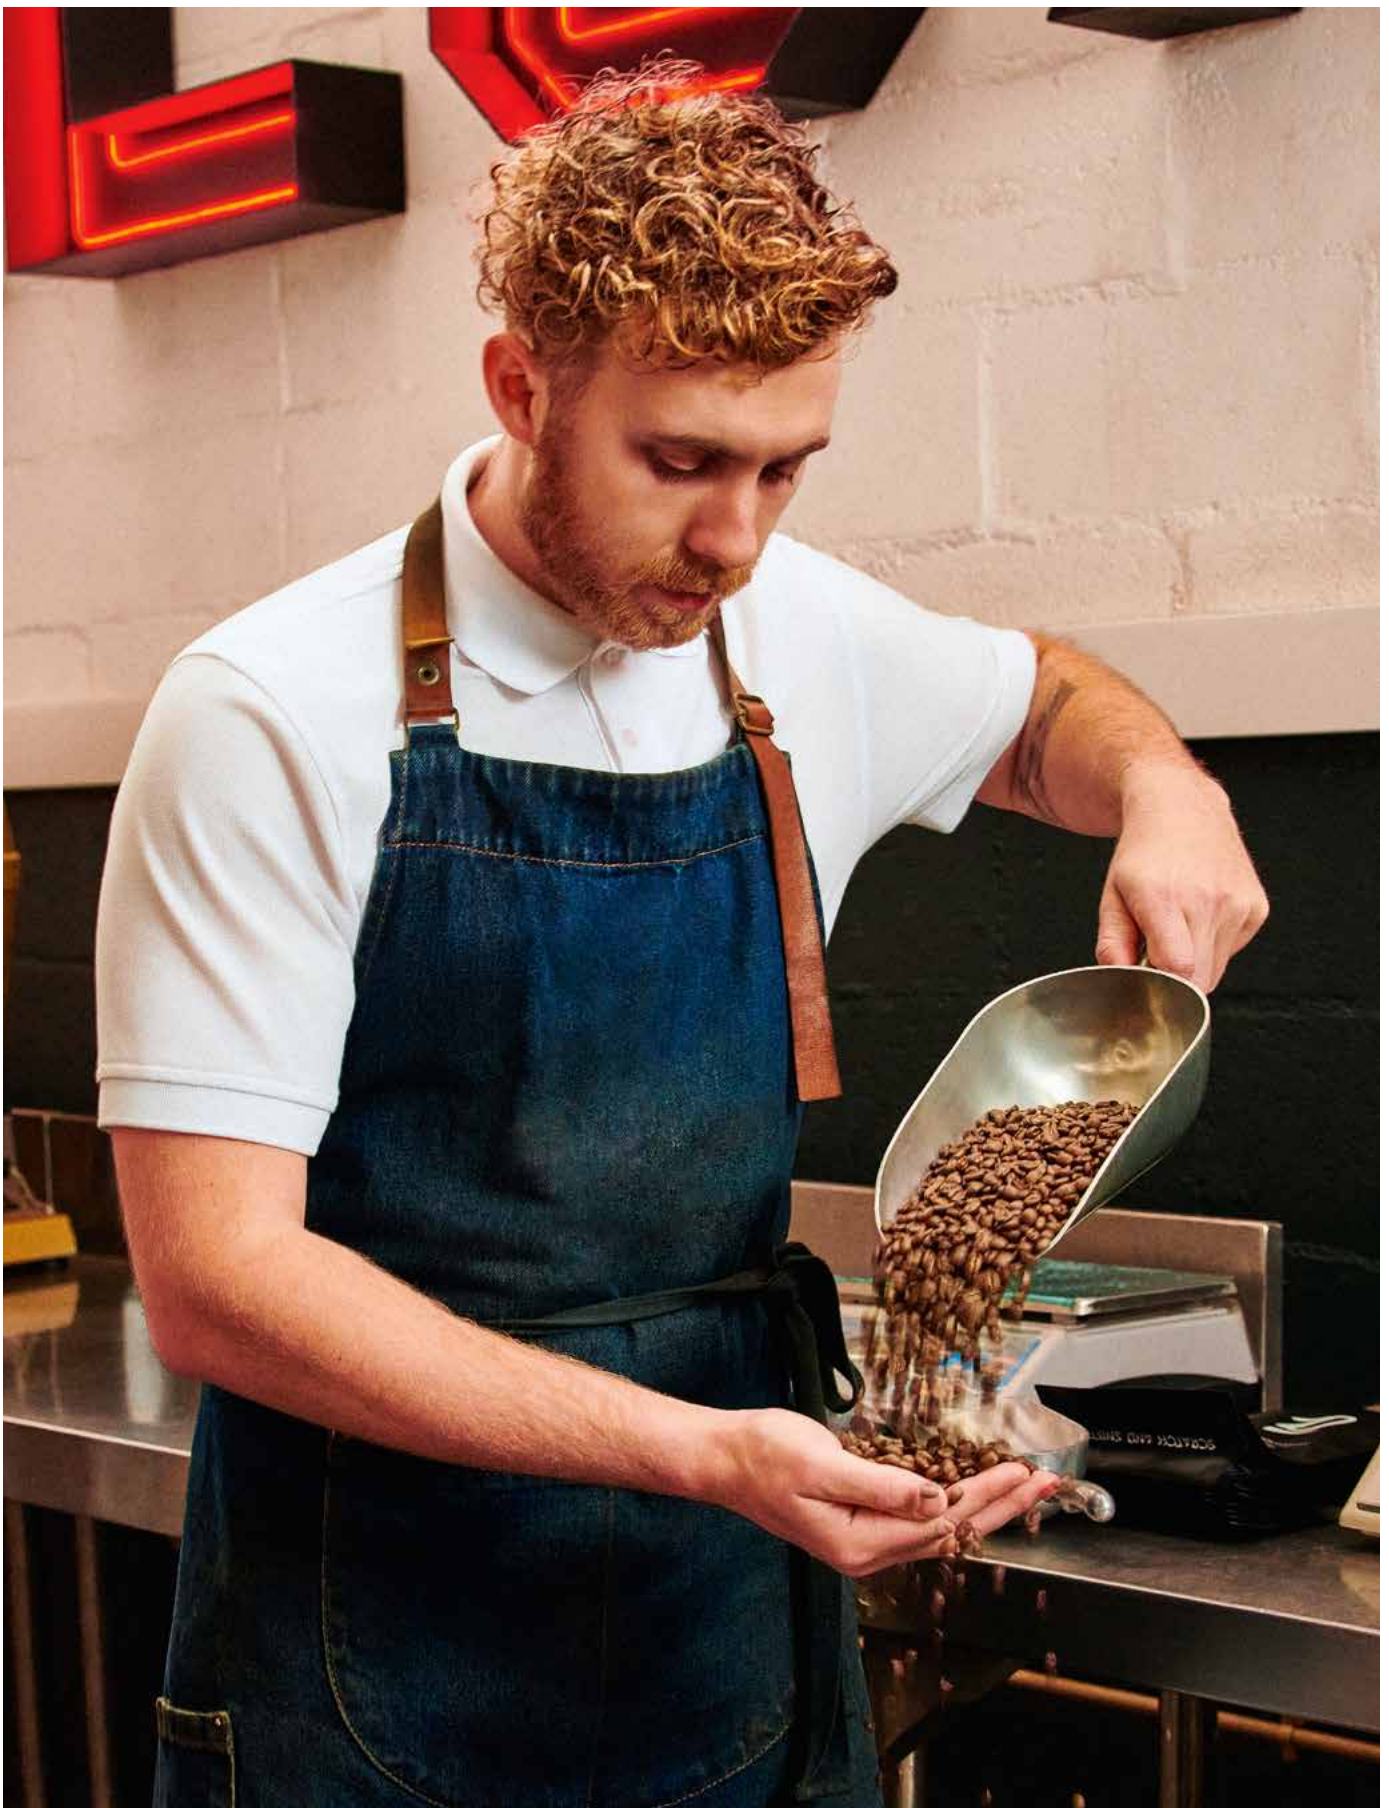

**SALARIES ABOVE THE
MINIMUM WAGE**

**VOLUNTARY
SOCIAL BENEFITS**

**FREE HEALTH
PROMOTION ACTIVITIES**

NO. 810, HAKRO Polo shirt Classic, 001 white

THERE WHEN YOU NEED US.

The finest goods are no use if they are not available. HAKRO offers security of supply with seamless warehousing and supply chains – and can deliver in bulk within 24 hours.

Looking for 5,000 polo shirts in ice blue by tomorrow? They're on their way already! In our state-of-the-art Schrozberg logistics center, more than five million garments are in stock. NOS stock is the industry term meaning “never out of stock”. This means we can deliver in bulk from one day to the next. For many of our customers, this is a massive plus.

To make things even quicker, our logistics are nearly all automated. This saves a lot of time – which is why we are planning further measures in the future to speed up our deliveries through smart technology. We believe progress is the key to better performance and making your life easier.

We also want to set new standards in this respect. For the industry. And for you.

Examples of how HAKRO optimises logistics:

PERMANENT STOCK

24-HOUR DELIVERY

Specialist advice

HIGH VALUE NOT LOW COST.

What only the specialist trade can do – tell you exactly what the best solution for your needs is. As corporate wear is a complex subject, our sound advice is guaranteed to satisfy all criteria, including requirements, expectations and budget – and your team, of course.

Tailored teamwear solutions. What does your team need? For which weather conditions? In what quantities? How often can garments be washed? Can they be washed at home or in a commercial laundry? Where should the logo go? Should it be embroidered, flocked or printed – and is this Pantone shade actually available for textiles?

When talking to a HAKRO dealer, one quickly realises that teamwear planning is not a shopping spree. But for you, it's still very straightforward.

A HAKRO dealer will present the collection, advise on the choice of materials and finishes, plan quantities and washing cycles, give recommendations for roll-out, recommend sizes, advise on care, organise a fitting for your team and customise everything to ensure a made-to-measure Private Label collection.

Hard to believe there could be so much to it? That's where we come in!

FABRICS THAT TURN IT ALL UPSIDE DOWN.

Some innovations change everything

The latest HAKRO materials are a real game-changer. You will be astounded by our great range of fabrics whose colors shine more intensely after every wash than before.

MIKRALINAR® PRO ECO and MIKRALINAR® ECO are our 2023/2024 catalog highlights. You can find out more about them and other HAKRO innovations below.

DECENT THREADS YOU CAN WASH.

MIKRALINAR® PRO ECO

MIKRALINAR® PRO ECO is the world's first fabric whose colors become more intense with every wash. Its base is a water-insoluble vat dye. Everything else remains our trade secret. This is our first fabric to be 100% German-produced and to contain TENCEL™* lyocell fibers made from wood by industry leader Lenzing. The fabric is not only very environmentally friendly but also breathable, hypoallergenic and robust.

*TENCEL™ is a trademark of Lenzing AG.

MIKRALINAR®

SOFTNESS IS OUR STRENGTH.

MIKRALINAR® ECO

MIKRALINAR® ECO is completely new, super soft and has an all-natural high-quality cotton base. As the durability unique to HAKRO is achieved thanks to the addition of recycled polyester in accordance with the Global Recycled Standard, MIKRALINAR® ECO is also a very sustainable fabric.

Tough on the elements but gentle on you, the material can do everything that has made MIKRALINAR® a bestseller – and is even more sustainable. This is how softness became our strength.

ORGANICALLY BY HAKRO FOR KITH AND KIN.

Our GOTS collection

We believe that organic cotton should be worthy of the name. That's why we only use cotton that complies with the strict Global Organic Textile Standard (GOTS).

Impressed? There's more! In addition to our classic T-shirts and polo shirts, a great range of sweatshirts and hoodies are now on offer.

Practical T-shirt with a classy single jersey look and neck tape. Collar seam and inside of the side slits are filled with contrast fabric tape. HAKRO COTTON TEC® Women's V-neck shirt comes with a feminine V-neckline and a stylish, narrow neckband; the HAKRO COTTON TEC® T-shirt has a round neckline. Made using a special knitting process, in which two yarns are processed into a HAKRO COTTON TEC® double-face material. This creates an extra-fine, single jersey surface made of long-fiber, combed and ring-spun cotton on the outer side and a mesh layer made of the functional fiber TRIACTIVE® on the inner side. As a result, the T-shirt is temperature-regulating because moisture is quickly transported to the outer side where it can evaporate. Printed HAKRO neck label for maximum wearing comfort and woven HAKRO flag label on the left side seam.

Material Single jersey made of 50% cotton and 50% polyester **Finish** preshrunk **Property** easy-to-clean, breathable, carbon neutral product **Garment finishing** Screen printing, transfer printing, embroidery

FEELING GOOD FROM THE INSIDE OUT

Layers from the inside out.

Not only should your corporate wear be consistently well designed, it should also be purchased with care. Planning layer by layer from the inside out is best. Your HAKRO dealer will be happy to help.

Start with the base layer, the thin layer of clothing worn directly against the skin. The second layer is a bulkier, loose-fitting mid-layer. The third layer is usually a lighter water- and wind-repellent vest and jacket. The top layer is waterproof and windproof and keeps heat in.

TROUSERS

If you give your last shirt, please
only to buy one or two of our
new **trousers** for it. We could
understand that.

LOOKS & FEELS LIKE YOU.

Customized items or your own private collection

Looking for something more personal? Want to put together your own collection right away? There are so many ways to stand out with HAKRO – a color-contrasting cord in a hoodie or a belt with a customized buckle makes eye-catching teamwear.

HAKRO Private Label is the perfect option if you have your very own individual teamwear idea. But no matter what you choose, you can always rely on our unique quality and the highest sustainability standards.

PRIVATE LABEL — JUST FOR YOU.

Looking for something new?

Do your company and your team deserve something special? Talk to your HAKRO dealer because that's where your path to an exciting new look starts.

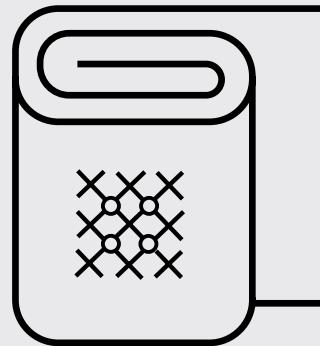

All you need is an idea of your dream teamwear. For the rest, your experienced HAKRO dealer can advise you on all aspects of materials, colors, fits, sizes and finishes.

HAKRO never scrimps on quality or sustainability. There are no limits to your creativity either – simply design a range within your budget.

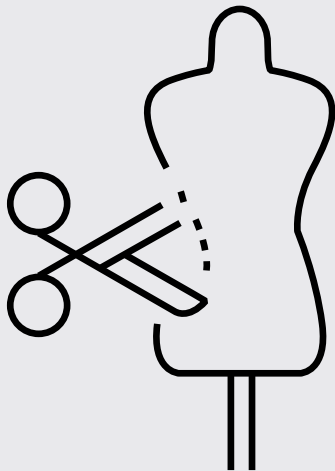

Your own design

Looking for customized buttons with laser engraving, special zips, your own labels or customized accessories?

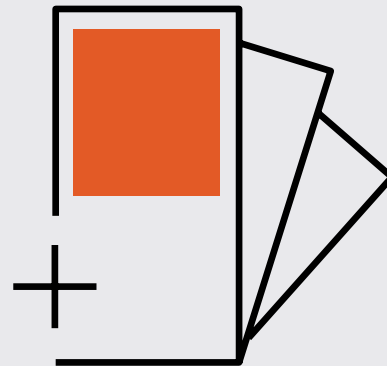

Your own material

True to our philosophy, we are happy to create durable, sustainable and well-designed new materials just for you.

Your own tailoring

Looking for something particularly stylish? We can tailor your designs just the way you want them.

Your own colors

We have 46 colors in our program but are happy to provide you with a 47th wash-resistant, color-proof shade.

We fulfill your wishes

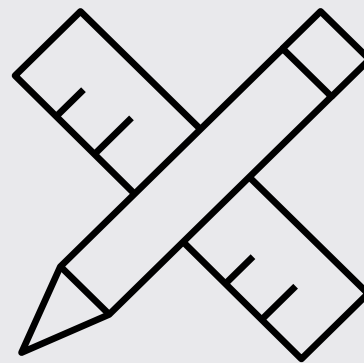

WITH HEART AND SOUL BUT WITHOUT COMPROMISE.

You have already decided to select your teamwear from HAKRO and are looking forward to the results. Thank you for choosing us. Because we care about your satisfaction, we do not scrimp on anything – especially not on the durability of our clothing. Our processes are always thought through down to the last detail.

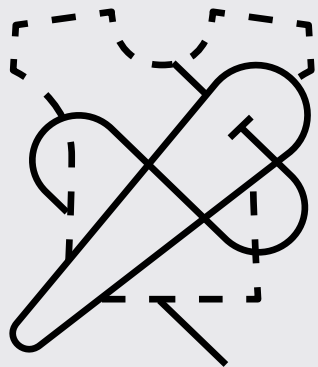

1. Tailored advice

Your HAKRO dealer will listen to your ideas, give you expert advice, showing you options and alternatives.

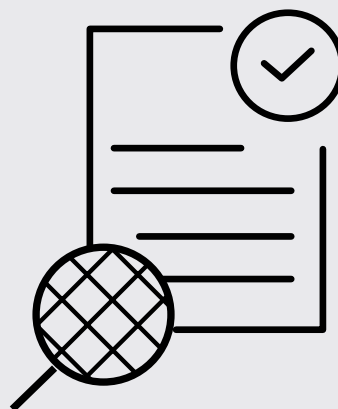

2. Customized designs

Based on your requirements, we can create customized designs that are in line with your organization and ideas.

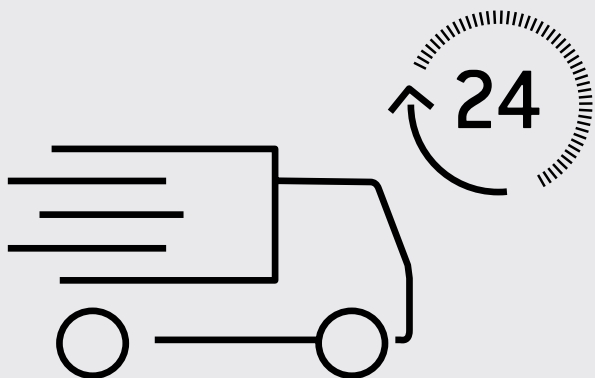

3. Ready-made patterns

Samples of your collection or custom-made products are produced. If everything fits, give us the go-ahead.

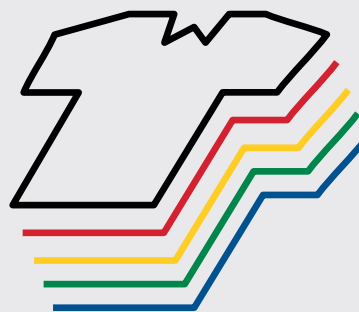

4. Controlled production

The entire production process takes place in our partner companies and is carefully controlled by us.

5. Punctual delivery

Our state-of-the-art logistics center reliably delivers your goods on time, neatly packed and clearly labelled.

6. Easy reordering

Your needs have grown? You can expand your collection with additional models or new customised creations.

YOUR POLO SHIRT THE WAY YOU LIKE IT.

**Did you know you can embellish your polo shirt
with your logo?**

Now you have purchased durable, sustainable and well-designed corporate apparel. All that's missing are the finishing touches, i.e. your logo, company name and brand. Don't you worry – our products are designed to offer great results regardless of the finishing. Your HAKRO dealer will advise you on which process is best for you and will also take care of everything else.

WE HAVE JUST THE RIGHT THING FOR YOU.

HAKRO offers the perfect fit with sizes from 2XS to 6XL

We make clothes for everyone, not just those with model measurements. In this regard, we have worked hard on a variety of different silhouettes and tweaked the cuts until our clothes fit and look good on as many different shapes as possible. Depending on the model, we offer up to three different fits and sizes from 2XS to 6XL plus children's sizes from 116.

Comfort Fit

Fits comfortably loose with plenty of freedom of movement.

Regular Fit

The perfect balance – not too tight nor too loose.

Body Fit

The right fit for all those who like their clothes figure-hugging.

THE RIGHT SIZE 99,9% OF THE TIME.

**Trying something on is far better than studying
size charts**

Try our clothing on in the fitting room. This way you can quickly find out which sizes you and your staff or club members need – promise. Make sure you feel comfortable and look good. We have something for everyone. Simply contact your HAKRO dealer who can advise you and organize a fitting.

* All measurement tables and sizes are subject to change. Slight dimensional deviations may occur due to cut optimisation, which is why we recommend a fitting at your HAKRO dealer.

Collar size. An additional measurement for shirts. Gently place a tape measure around the neck below the larynx.

Kids. Every child is unique. The age therefore only serves as a rough guide. Please note that children's sizes correspond to the body height in centimeters.

FOR A COLORFUL LIFE.

Forty-six shades

HAKRO colors are famous for making their wearers' eyes shine exceptionally brightly. This intensity is due to our exclusively developed color blends.

With our HAKRO TRUE COLORS color management system, we can deliver every color in the same tone, even years later. Our colors stay the same across different models. And because HAKRO clothing stays as bright and radiant as on the first day, even after many washing cycles – our colors stay bright for life.

* Due to the printing process, the colors shown here may differ from the actual textile colors. Under each color sample is the PANTONE and TCX color shade that comes closest to the HAKRO color shade. This information is meant as a guide only and is not binding.

TEXTILE GLOSSARY.

Technical terms in the world of textiles are not always the same thing. For some, they are part of their daily lexicon while others may only understand the term “fabric”. This is where our little glossary of HAKRO terms can help. And if there’s anything that’s still not clear, we’ll be happy to help of course.

Anti-pilling finish

Fabric treatment to prevent the formation of lint. See also “Microfleece”.

Breathable

A fabric is breathable if it is permeable to water vapour from the inside out, and the degree of breathability is defined by the MVTR value (moisture vapour transmission rate). This value indicates the amount of water that can evaporate through a square meter of fabric within 24 hours. The higher the amount, the greater the breathability of the textile.

Buttons

HAKRO buttons are made of unbreakable, 3 mm thick high-performance polyester. They are permanently sewn with a special lock stitch process. See also “Lock stitch process”.

Clever Care

An initiative of the International Association for Textile Care Labelling (GINETEX) regarding washing, drying and ironing as well as professional textile care.

COOLMAX® PRO

This high-tech functional material from “The LYCRA Company” optimally regulates body heat: its special four- or six-channel fibers transport moisture directly to the fabric surface, where it evaporates extremely quickly. For maximum comfort, we only use the highest performance level COOLMAX® PRO in our products.

Cotton

The quality of a cotton depends mainly on the fiber length. In the textile industry, this is called the “staple length”. The longer this vegetable fiber is, the finer and more tear-resistant the cotton is. HAKRO only uses long-staple, combed and ring spun-cotton.

Double-face material

Refers to a fabric with two different materials for the inside and the outside.

HAKRO COTTON TEC®

A so-called double-face material in which the outside consists of particularly fine cotton and the inside of the functional fiber TRIACTIVE®. As the material quickly transports moisture to the outside of the fabric, it is temperature-regulating.

Interlock

A stretchy, double-faced knitted fabric showing only right-hand stitches on both sides of the fabric.

Knitwear

Knitted goods are knitted garments, which are thicker, heavier and more heat-insulating than woven fabrics or warp-knitted textiles. An elastic right-left knit is formed by the production of meshes using a thread or yarn and two or more needles.

Lock stitch procedure

Our buttons are sewn on using the so-called lock stitch method. Both the button and the knot are secured for maximum durability.

Long-staple

Refers to the length of cotton fibers and is considered a quality criterion. The longer the fibers of the cotton plant, the higher the quality of the fabric. HAKRO uses high-quality, long-staple cotton. See also “Cotton”.

LYCRA®

High-quality material spandex from “The LYCRA Company” has an extremely high elasticity and equally high elastic recovery.

Membranes in textiles

A membrane is a special layer that is firmly bonded to the back of an outer fabric. Membranes ensure the wearing comfort and breathability of functional clothing. They protect against external moisture, but allow water vapour to escape. Compared to coatings, membranes are robust, abrasion-resistant and therefore more durable.

Merino wool

The merino wool used by HAKRO is an animal fiber that is particularly fine, does not scratch and has a soft feel. It has an even stitch pattern, offers a high level of wearing comfort and can be washed at 30°C.

Microfleece

The velvety-soft, very dense material made of 100% polyester is extremely light, warming, wind-repellent, elastic and offers a high degree of wearing comfort. Microfleece textiles from HAKRO are particularly easy to care for and have an additional anti-pilling finish. See also “Anti-pilling finish”.

MIKRALINAR®

The hypo-allergenic functional blend MIKRALINAR® developed especially for HAKRO combines the advantages of cotton with the strengths of a special high-performance polyester. It absorbs moisture well and transports it quickly to the outside. Materials made from MICRALINAR® are suitable for industrial laundering and leasing, and are particularly hard-wearing and tear-resistant while retaining their shape. Due to their extra breathability, they offer a high level of comfort.

MIKRALINAR® ECO

MIKRALINAR® ECO is definitely the softest MIKRALINAR® experience you can imagine. Yet it is just as robust and reliably reproducible as our popular original MIKRALINAR®. But with MIKRALINAR® ECO we use recycled polyester according to GRS, the Global Recycled Standard.

MIKRALINAR® PRO

In addition to the advantages of MIKRALINAR®, MIKRALINAR® PRO is yarn-dyed with water-insoluble vat dyes, boil-proof at 95°C, chlorine- and UV-resistant and thus ideally suited for professions with special hygienic requirements or extreme degrees of soiling.

MIKRALINAR® PRO ECO

With MIKRALINAR® PRO ECO we use polyester in combination with TENCEL™ lyocell fibers from Lenzing. They are made from sustainably produced wood where the required solvent is recovered and reused. The fibers are known for their high strength properties and breathability. For MIKRALINAR® PRO ECO we use a water-insoluble vat dye. It is the first TENCEL™ polyester knitted fabric suitable for industrial laundering, certified according to the Hohenstein “tested workwear – suitable for leasing” quality standard.

Multi-layer laminates

All jackets equipped with a membrane consist of at least two layers of different materials. With two-layer laminates, the jacket has an additional light lining on the inside that prevents direct contact with the membrane. With 2.5-layer laminates, the membrane is protected by another printed coating. With three-layer laminates, another layer of fabric, for example microfleece or mesh, is applied to the membrane instead of the printed coating. This third layer makes the multi-layer laminate particularly durable and comfortable to wear. Multi-layer laminates are 100% waterproof if the seams have been treated with an additional tape sealant after the garment has been made. Without this additional sealing, multi-layer laminates are merely water-repellent.

Non-iron finish

Blouses and shirts with a “non-iron finish” are easy to care for and can be worn immediately after washing and drying. Simply remove the residual moisture from clothes using a dryer and hang up to dry completely.

Pima cotton

A particularly high-quality type of cotton with long, fine fibers. Textiles made from Pima cotton have a smoother surface, are full to the touch and exceptionally soft.

Piqué

A knitted fabric with alternating raised and recessed areas. It has a “waffle” (piqué) appearance and is a classic material for polo shirts.

Polyester fabrics

Fabrics made of polyester are tear-resistant, lightweight and absorb almost no moisture. They also strike the correct balance between insulation, moisture transport, tear and abrasion resistance and are therefore currently the most commonly processed fabrics in the functional and sports clothing segment. Since polyester fibers are produced synthetically, there is a wide range of different fibers resulting in the right product for every requirement. The properties vary greatly and have an impact on the function, moisture transport and wearing comfort of the clothing.

Pre-treatment

Mechanical-thermal textile treatment for low shrinkage within fixed tolerances.

PRO LABEL

Tested care labelling for professional textile care, especially for commercial laundries.

Ripstop

Particularly tear-resistant fabrics that are woven using a special technique. Thicker threads are integrated into the otherwise fine material at regular intervals. This makes the fabric particularly stable and tear-resistant.

Single jersey

Fine mesh, stretchy knitted fabric for outer-wear.

Softshell

A combination of outer and mid-garment layers in a single product. The material is smooth, windproof and water-repellent on the outside. It also offers a soft surface and pleasant wearing comfort on the inside. Softshell jackets are elastic and ideal as workwear due to the freedom of movement they offer.

Softshell light

Breathable, durable, water-repellent and windproof material made of lightweight two-layer softshell with TRIACTIVE® PRO technology. Suitable for all indoor and outdoor activities.

Stretch

The addition of LYCRA® brand elastane gives fabrics more stretch – this increases comfort and freedom of movement.

Sweat- and lined wear

Single-surface, usually round-knitted knitted fabrics, in which an additional soft padding thread is incorporated so that it remains hidden by a cover thread on the front side. Finished goods have a right-knit on one side or may be very brushed on the rear. This brushing might cause lint formation on the inside of some sweat-wear but this ceases after the first wash.

TENCEL™

TENCEL™ Lyocell fibers are made from sustainably grown wood in a process where the solvent required is recovered and reused. The fibers are known for their high strength, active breathing and comfort on the skin.

Textile area weight

The weight of a material in grams per square meter. This is an important indicator of the quality of textiles.

Think Green – wash at 30°C

Nowadays, putting on a wash at 30°C is perfectly sufficient. The laundry still comes out clean because modern detergents are already active at low temperatures. The major bonus for the environment is that washing at 30°C saves up to 40% in terms of energy. That's why HAKRO has launched the "Think Green – wash at 30°C" initiative. Now you can join us!

TRIACTIVE®

Textiles made from this high-quality functional yarn wick moisture away to the outside at an accelerated rate thanks to the multi-channel technology of the special yarn construction – the ideal garment for high-intensity activities.

TRIACTIVE® PRO

Stands for waterproof, windproof and vapour permeable fabrics. HAKRO uses TRIACTIVE® PRO wherever our clothing needs to have very good breathability or vapour permeability and water-resistance.

TRUE COLORS

A high-tech color technology for the highest color fidelity and stability. This ensures our textiles are at their most lightfast and wash-resistant. At the same time, special color assurance processes ensure that the shades are identical for all models in the collection. And because this also applies to all delivery batches, you will always receive the same color tone if you order again – even years later.

Vat dye

Color that has no discernible solubility in water. For this reason, vat dyes are always used when extremely high demands are placed on the coloring. Garments dyed with vat dyes are boil-proof, chlorine- and color-fast and much less sensitive to sunlight.

Washing and care recommendations

All HAKRO textiles are provided with carefully developed care instructions. Please follow these carefully.

Water column

Unit of measurement for the impermeability of outer materials. The water column indicates how much water can weigh on the outer fabric before it lets moisture through. A one meter water column corresponds to approximately 0.098 bars. Clothing with a water column of 1,300 mm or more can be described as waterproof.

Windproof

Windproof textiles are designed to prevent the wind from cooling the wearer down too quickly. The higher the wind speed, the colder the perceived temperature. For example, an outdoor temperature of -1°C at a wind speed of 64 km/h is experienced as -21°C. This effect can be prevented by windproof textiles.

Yarn

HAKRO only uses quality sewing threads from well-known brand manufacturers. To produce such threads, yarns are refined, which means that at least two threads are twisted together, increasing the degree of tear resistance and the durability of the seams depending on the number of twists.

YKK®

Manufacturer of high-quality zips, studs and eyelets.

Zips

HAKRO uses quality zips from YKK® that don't break even after they've been opened and closed umpteen times.

ALL GOOD THINGS ...

Durable, sustainable and well-designed

With the highest standards of quality and sustainability throughout the entire supply chain, fair production and a dedicated portfolio, we're "squaring the textile circle". With innovative solutions, everything comes together. This is not always easy, but the philosophy is simple.

Through better quality and material properties, we achieve a longer service life for our clothing. This is more sustainable and saves money. But better fabric qualities also feel better and are popular with the wearer, therefore boosting employee motivation. The external image of entire organizations is also improved by carefully choosing sustainable products and suppliers, among other things.

MIKRALINAR®

THE LESS YOU ORDER, THE BETTER.

HAKRO HÄLT. SEIT 1969

The fact that our clothing can be used for a remarkably long time saves companies a lot of money. And because longer use is also better for the climate than fast fashion, every order you don't place makes us happy because your team-wear is still in great shape. This has unparalleled benefits for you, for the environment, for all of us. And what HAKRO quality means in terms of fiber, color and other details is also reflected in our complaint rate of 0.1 percent.

Examples of how quality is ensured at HAKRO.

Not too short and comb neatly, please!

No, we're not talking about your hair. HAKRO uses well-combed cotton with a staple length of at least 30 mm. The long fibers ensure a fine stitch pattern, smooth, hard-wearing surfaces and help our clothes last much longer.

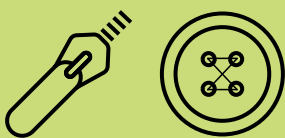

Strong fabric – made by us, for you.

If we are not impressed by what's on the market, we develop our own materials. This is time-consuming, but worth every effort. Our functional materials such as MIKRALINAR®, COOLMAX® PRO, TRIACTIVE® and TRIACTIVE® PRO or HAKRO COTTON TEC® offer excellent properties that set new standards in so many respects.

20 seam variations and lots of stitches.

There are 20 different variations of color-fast seams on our garments sewn with flexible branded thread – and with significantly more stitching than usual. In addition, our side seams are high quality and not made of tubular fabric. Darn it! You will never curse your seams again.

Non-zippers and buttons that stay put.

Some zips live up to their name. But who likes torn fasteners? We prefer to go for first-class zips from industry leader YKK®. To avoid buttons falling off or breaking, ours are made of extra-strong, high-performance polyester and are made tough using the lock stitch process. We offer a lifetime guarantee.

Intolerant – that's who we are and how we'll stay.

Can you let go? Trust fully? Accept mistakes? We can. But never when it comes to the quality of our textiles. We are so “intolerant” that we actually look for mistakes using electronic tools. All this means that you can be assured of the highest quality. And that is our goal.

TALK IS CHEAP.

There is so much to do. We have already started by taking concrete action.

The omnipresence of the term sustainability is clearly at odds with what is actually being done. The fact that so much is being said about this topic is nevertheless good – it strengthens our collective awareness of the problem. This all comes down to nature, which could restore so much with its enormous self-healing powers, if only it were allowed to do so. What we do at HAKRO in concrete terms is outlined in detail in our Integrated Sustainable Management Report 2022. Have a read – at www.hakro.com.

Carbon neutral from head to toe.

Since 2017, we have been carbon neutral at our company headquarters in Schrozberg. By the start of 2022, we were the first corporate wear supplier to have implemented this for our entire collection – from our hoodies to our socks.

Wear your carbon neutrality with pride thanks to HAKRO.

Fair Wear Foundation (FWF) We have been a member of the Fair Wear Foundation since 2021. The international multi-stakeholder initiative monitors working conditions and social justice in the production facilities of textile companies. The annual FWF Brand Performance Check helps us to objectively determine what is already working and where we can still improve. Our ambition is to achieve FWF “Leader” status. We like to set ourselves ambitious goals.

Cotton made in Africa (CmiA) We have been a partner of Cotton made in Africa since 2017 and insist on socially and ecologically sustainable cotton. All our products made in Bangladesh with the “Supporting the cotton made in Africa Initiative” label help train smallholder farmers in efficient and sustainable farming methods. This benefits them and their families, and protects the environment.

Global Organic Textile Standard (GOTS) GOTS is the world’s largest and most comprehensive standard for the processing of organic cotton in the textile supply chain. GOTS defines environmental requirements at a high level along the entire textile supply chain and at the same time keeps an eye on the social criteria to be met, including all ILO core labour standards. For a garment to carry the GOTS seal, it must be made of at least 70% GOTS certified cotton. In addition, every processing company in the supply chain must be GOTS-certified.

Global Recycled Standard (GRS) The Global Recycled Standard is the world’s leading standard for the processing of recycled materials. GRS sets out high environmental and social requirements for the additional processing of fibers along the entire textile supply chain. These include the ILO core labour standards, including the prohibition of child labour. We have been certified according to the GRS criteria since 2020.

Company

WE SUPPORT

Product

Choose HAKRO.

- Popular with workforces
- Maximum life: many wash cycles
- Best fit from 116 to 6XL
- 46 great, long-lasting colors
- Unique and in some cases exclusive materials
- Immediate delivery thanks to a fully stocked warehouse
- Ideal for all common textile finishing processes
- Post-purchase guarantee with color warranty
- Carbon neutral company
- Carbon neutral products
- High sustainability standards
- Fair production conditions
- Wide-ranging social commitment

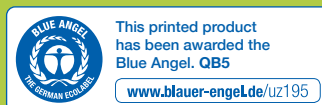

Why did you choose HAKRO? Tell us! We want to hear from you.
Let us know. We look forward to hearing from you.
